

Energy Saving Compact Fluorescent Light Bulb

Save Energy up to 80%

Lasts 10 times longer

Trilight

Applications

TRILIGHT is another innovative lighting solution for three-way lighting sockets from **LUXLITE**. In North America three-way bulb is a popular item because the lamp holder (socket) and the bulb are designed in a way that changes intensity to 3 different levels with each switching. **TRILIGHT** is the answer to this commonly used high energy spending incandescent three-way bulb to replace with an energy saving **LUXLITE** bulb that works with standard three-way sockets.

TRILIGHT is the dream comes true it combines the features of an incandescent bulb with energy saving rewards from CFL designs. Smart ballast with built-in integrated circuit controller, high quality three color phosphor powder double coated in glass tubes, top grade components, automated dual wave soldering, 100% aging & switching test makes a **TRILIGHT** durable and consistent in three-way applications.

TRILIGHT compact fluorescent bulb is very suitable replacement for most types of incandescent three-way bulbs fixtures for example, in table lamps, desk lamps, floor lamps, reading lamps, wall scones etc.

Save Energy = Save Money

Replacements

11/18/23W = 40/75/100W
18/23/35W = 75/100/150W

Watts	Lumens	Diameter		Length (MOL)	
11W/18W/23W	550 / 1080 / 1380	60mm	2 6/16"	135mm	5 5/16"
18W/23W/35 W	1080 / 1380 / 2200	60mm	2 6/16"	150mm	5 14/16"
